Nota: En la columna de clase textural, la clave 1 corresponde al nombre de gruesa, la 2 a media y la 3 a fina. Los porcentajes se calcularon con las fuentes originales sin generalizar. La referencia temporal del cuadro está referida al marco geoestadístico.

a/ Suelos con arcillas de baja actividad y que no son fértiles en general para la agricultura. Muy susceptibles a la erosión por deforestación y remoción de raíces. Los Acrisoles son representativos de zonas muy lluviosas. Se caracterizan por sus colores rojos o amarillos claros con manchas rojas y por ser muy ácidos.

b/ Suelos de origen volcánico reciente y que son muy ligeros en peso debido al abundante alófono o complejos aluminio-humus en los primeros 30 cm de profundidad. Tienen una consistencia grasosa o resbaladiza. Si bien los Andosoles son fáciles de cultivar y tienen buenas propiedades de enraizamiento y almacenamiento de agua, cuando están situados en ladera es preferible conservarlos bajo su vegetación original.

Presentan valores superiores en promedio a 3.0% de carbono orgánico y se erosionan rápidamente por deforestación y remoción de raíces. Los Andosoles mexicanos son particularmente frágiles debido a que en su mayoría están situados en regiones con cambios

c/ Suelos con más del 85% de arena. Incluyen arenas recién depositadas en dunas o playas también de arenas residuales formadas por meteorización de sedimentos o rocas ricas en cuarzo. No tienen buenas propiedades de almacenamiento de agua y nutrientes, pero ofrecen facilidad de labranza y enraizamiento. Los Arenosoles más susceptibles a la degradación por cambio de uso son los de clima

d/ Suelos de clima árido o semiárido, con una capa superficial gruesa, negra o muy oscura y rica en carbono orgánico, fértiles en magnesio, potasio y carbonatos en el subsuelo. La mayor parte de los Chernozems se encuentran en clima semicálido seco o semisecco (BS0, BS1) y se emplean en la agricultura de riego o temporal, en el cultivo de pastizales.

e/ Suelos con más del 15% de carbonato de calcio en por lo menos una capa de 15 cm de espesor. Muchos cultivos en Calcisoles tienen éxito si son fertilizados además con nitrógeno, fósforo, hierro y zinc. Es uno de los grupos de suelo más extendidos en el país.

f/ Suelos jóvenes con algún cambio apreciable en el contenido de arcilla o color entre sus capas u horizontes de suelo. Son suelos que no tienen un patrón climático definido pero que pueden encontrarse en alguna posición geomorfológica intermedia entre cualquiera de dos grupos de suelo considerados por la WRB. Tienen en el subsuelo una capa más parecida a suelo que a roca y con acumulaciones moderadas de calcio, hierro, manganeso y arcilla. Son de moderada a alta susceptibilidad a la erosión.

g/ Suelos con abundantes sedimentos fluviales, marinos o lacustres en periodos recientes y que están ubicados tradicionalmente sobre planicies de inundación, abanicos de ríos o marismas costeras. Tienen buena fertilidad natural y son atractivos históricamente para los asentamientos humanos de nuestro país. Los Fluvisoles con influencia de marea son suelos ecológicamente valiosos en los que la vegetación original debe preservarse.

h/ Suelos propios de humedales y que bajo condiciones naturales están afectados por agua subterránea en los primeros 50 cm de profundidad. Presentan manchas azul verdosas o negruzcas que denotan presencia de sulfuro de hierro o metano. También presentan manchas rojas en el periodo seco cuando los agregados son expuestos al aire y el hierro es oxidado. El encalado y el drenaje combinados son prácticas que aumentan la disponibilidad de nutrientes y carbono orgánico, así como disminuyen la toxicidad por aluminio en el suelo.

i/ Anteriormente se conocían como Litosoles, del griego Lithos, piedra. Actualmente representan a suelos con menos de 25 cm de espesor o con más de 80% de su volumen ocupado por piedras o gravas. Son muy susceptibles a la erosión por las diversas actividades humanas.

**Superficie estatal por grupo de suelo
2020
(Porcentaje)**

Cuadro 1.8

| Clave - Nombre - Clave textural | Total |
|--|-------|
| j/ Suelos rojos, grises o pardos claros, susceptibles a la erosión especialmente aquellos con alto contenido de limo y los situados en pendientes fuertes. Los Luvisoles son generalmente fértiles para la agricultura. Son el quinto grupo de suelos más extendido sobre nuestro | |
| k/ Suelos tropicales profundos, intensamente rojos o amarillos, con arcillas de alta capacidad de retención de humedad y con agregados brillantes fuertemente estructurados. Pueden ser los suelos más productivos de los trópicos húmedos. Por su profundidad y capacidad de enraizamiento son moderadamente estables frente a la erosión. | |
| l/ Suelos de clima semiseco y subhúmedo, tipos BS1, (A)C y Aw0, de color superficial pardos a negro, fértiles en magnesio, potasio, aunque sin carbonatos en el subsuelo. El relieve donde se desarrollan estos suelos es generalmente plano o ligeramente ondulado. | |
| m Suelos con propiedades físicas o químicas insuficientes para colocarlos en otro grupo de suelos. Son pedregosos, de color claro en general y se parecen bastante a la roca que les ha dado origen cuando no son profundos. | |
| n/ Suelos con enriquecimiento en sales fácilmente solubles en algún momento del año, formadas en ambientes de elevada evapotranspiración. Las sales son apreciables cuando el suelo está seco y en la mayoría de las veces precipitan en la superficie formando una costra de sal. Las sales afectan la absorción de agua por las plantas y afectan el metabolismo del nitrógeno. Algunos métodos de control son el riego y uso de yeso combinado. | |
| ñ/ Suelos oscuros y ácidos en la superficie, de clima húmedo o subhúmedo, en ambiente montañoso principalmente. Son susceptibles a la erosión por efecto de la deforestación del bosque o selva donde es localizado comúnmente. | |
| o/ Suelos pesados bajo condiciones alternadas de saturación - sequía, con grietas anchas, abundantes y profundas cuando están secos y con más de 30% de arcillas expandibles. Mediante un buen programa de labranza y drenaje estos suelos son bastante fértiles para la agricultura por su alta capacidad de retención de humedad y sus propiedades de intercambio mineral con las plantas. Las obras de construcción asentadas sobre estos suelos deben tener especificaciones especiales para evitar daños por movimiento o inundación. Son bastantes estables frente a la erosión. | |
| p/ En el concepto Otro no se representa en el mapa de suelos dominantes, ya que es la sumatoria de varios tipos de suelo con áreas mínimas no cartografiables. | |

| 02-II-2006 Manglares y Humedales de Tuxpan | 6 870 | 21.044444 | - 97.368611 |

Nota: Los sitios Ramsar se refieren a humedales de importancia internacional, considerados como ecosistemas fundamentales en la conservación y el uso sustentable de la biodiversidad, con importantes funciones (regulación de la fase continental del ciclo hidrológico, recarga de acuíferos y estabilización del clima local), valores (recursos biológicos, pesquerías y suministro de agua) y atributos (refugio de diversidad biológica, patrimonio cultural y usos tradicionales). Estos sitios se han venido determinando y registrando en México a partir del 04 de noviembre de 1986 derivado de la Convención celebrada en 1971 en la ciudad de Ramsar, Irán. Cabe señalar que estos humedales pueden o no estar incluidos dentro de las denominadas áreas naturales protegidas.

Nota: La información corresponde a las Áreas Naturales Protegidas agrupadas dentro de la categoría de manejo denominada Parques y Reservas Estatales, establecida en el Artículo 46, fracción IX, de la Ley General del Equilibrio Ecológico y la Protección al Ambiente, la cual otorga facultades a los estados para establecer, categorizar, administrar y manejar dichas áreas dentro de su jurisdicción territorial.

a/ Para este tipo de área, la fecha de decreto corresponde a la de certificación. Para las Áreas Destinadas Voluntariamente a la Conservación no se integraron las menores a una superficie de 100 ha; siendo un total de 821 áreas y sumando una superficie total de 6 Fuente: Secretaría de Medio Ambiente del Gobierno del Estado. Subdirección de Recursos Naturales y Servicios Ambientales; Departamento de Espacios Naturales Protegidos.

Nota: Se entiende por tipo de servicio público, a aquél brindado por las plantas de tratamiento que fueron diseñadas con el objetivo de tratar las aguas residuales generadas dentro de las localidades que son manejadas en los sistemas de alcantarillado municipales, urbanos y rurales; también llamadas aguas municipales. En cuanto al tipo de servicio privado, son aquellas plantas de tratamiento que fueron diseñadas con el objetivo de tratar las aguas residuales generadas dentro de las industrias y empresas prestadoras de servicios; también denominadas no municipales.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

a/ Datos referidos al 31 de diciembre.

b/ Se refiere a ajuste de pH y remoción de materiales orgánicos y/o inorgánicos en suspensión con tamaño igual o mayor a 0.1 mm.

c/ Se refiere a remoción de materiales orgánicos coloidales y disueltos.

d/ Se refiere a: Remoción de materiales disueltos que incluyen gases, sustancias orgánicas naturales y sintéticas, iones, bacterias y virus.

Nota: En abril de 1997, mediante acuerdo gubernamental se sustituyó la Licencia de Funcionamiento por la Licencia Ambiental Única (LAU), pero para el caso de la entidad empezó a operar el cambio en enero de 1999, por lo cual, a partir de ese periodo, todos los establecimientos nuevos que solicitan licencia en materia de control ambiental tienen que hacerlo por medio de la última (LAU); sin embargo, las empresas que cuentan con Licencia de Funcionamiento expedida antes de esa fecha, no están obligadas necesariamente a sustituirla por la nueva licencia, a menos que requieran actualizaciones o modificaciones en las condiciones originales con que la licencia se otorgó.

A diferencia de la Licencia de Funcionamiento, la Licencia Ambiental Única permite coordinar en un solo proceso la evaluación, dictamen y resolución de los trámites ambientales que los responsables de establecimientos deben cumplir ante la SEMARNAT en materia de impacto ambiental y riesgo, emisiones a la atmósfera, generación de residuos peligrosos y tratamiento de estos; y ante la Comisión Nacional del Agua en lo que se refiere a descarga de aguas residuales y trámites relacionados con cuerpos de agua y bienes nacionales.

La sectorización de actividad preponderante fue establecida con base en el *Sistema de Clasificación Industrial de América del Norte, México SCIAN 2018*.

Centros, vehículos verificados, multas y su importe e ingresos generados por el servicio y por la concesión en el programa estatal de verificación vehicular de emisión de contaminantes atmosféricos 2021

Cuadro 2.20

| Concepto | Total |
|--|---------|
| Centros de verificación vehicular a/ | 250 |
| Vehículos verificados | 539 737 |
| Multas | ND |
| Importe de multas (Miles de pesos) | ND |
| Ingresos generados por el servicio (Miles de pesos) b/ | 58 379 |
| Ingresos generados por la concesión del servicio (Miles de pesos) c/ | 4 770 |

Nota: Los 250 Centros de verificación vehicular activos se encuentran ubicados en 63 municipios del estado. El programa es obligatorio en la entidad. La verificación vehicular es semestral.

a/ Datos referidos al 31 de diciembre.

b/ Comprende el monto de los ingresos por concepto de impuestos y venta de hologramas, que deriven del pago de cada verificación vehicular, sin incluir las comisiones del propietario de cada centro.

c/ Se refiere al monto anual que percibe el gobierno estatal, por las concesiones que otorga a los propietarios de los centros de verificación para su funcionamiento.

**Divorcios por tipo de trámite según duración legal del matrimonio
2020 y 2021**

Cuadro 3.22

| Tipo de trámite | Total | Menos de 1 año | 1 año | 2 a 5 años | 6 a 9 años | 10 y más años | No especificado |
|------------------------|--------------|-------------------|-------|---------------|---------------|------------------|--------------------|
| Voluntario unilateral | 511 | 4 | 9 | 56 | 64 | 378 | 0 |

a/ Se refiere al que se tramita ante un oficial del Registro Civil y solo puede llevarse a cabo cuando los esposos son mayores de edad, no tienen hijos y de común acuerdo han liquidado su sociedad conyugal, si bajo ese régimen se casaron.

b/ Se refiere al que se tramita ante un juez de lo familiar, y puede ser voluntario o necesario. El primero procede cuando sea cual fuere la edad de los cónyuges y habiendo procreado hijos, están de acuerdo en disolver el vínculo conyugal por mutuo consentimiento, celebrando un convenio que someten a la aprobación del juez; el segundo, es solicitado por el cónyuge inocente cuando el otro ha cometido alguno de los hechos que se enuncian como causas de divorcio.

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados. Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados. Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

| | 2010 | 2015 | 2020 | 2010 | 2015 | 2020 | 2010 | 2015 | 2020 | 2010 | 2015 | 2020 |
| Zozocolco de Hidalgo | 14 691 | 12 256 | 15 031 | 36.1 | 40.9 | 40.5 | 5 310 | 5 014 | 6 094 | 3.1 | 2.8 | 2.8 |

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSSENGH 2010, MEC 2015 del MCSSENGH o MEC 2020 del MCSSENGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018. La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSSENGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSSENGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSSENGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados. Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados. Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota:

La población presentada en estos cuadros tiene un propósito exclusivamente estadístico: está calibrada para que, en las estimaciones de pobreza, la suma de la población municipal sea igual a la población de cada entidad federativa reportada con base en la información del MCSENIGH 2010, MEC 2015 del MCSENIGH o MEC 2020 del MCSENIGH publicados.

Por lo anterior, estas cifras de población podrían diferir de las reportadas por el INEGI y CONAPO a nivel entidad federativa.

Algunas cifras pueden variar por cuestiones de redondeo.

La información relacionada con la medición de pobreza municipal 2010 se actualiza con fecha 18 de diciembre de 2017, toda vez que en la construcción de la carencia por acceso a los servicios básicos de la vivienda se considera el combustible que se utiliza para cocinar. Lo anterior ya se hizo del conocimiento de los usuarios de la información para fines presupuestales y de planeación que se llevarán a cabo a partir de 2018.

La información que se presenta permite, por primera vez, contar con tres estimaciones en el tiempo de los indicadores de la medición multidimensional de la pobreza a escala municipal. La comparabilidad de estos datos permite observar la evolución de la pobreza que ha tenido lugar en el país entre 2010, 2015 y 2020 a nivel de desagregación municipal.

Fuente: CONEVAL. Estimaciones con base en el MCSENIGH 2010, la muestra del Censo de Población y Vivienda 2010, el Modelo Estadístico 2015 para la continuidad del MCSENIGH, la Encuesta Intercensal 2015, el Modelo Estadístico 2020 para la continuidad del MCSENIGH y la muestra del Censo de Población y Vivienda 2020. www.coneval.org.mx (2 de enero de 2022).

Nota: La información se refiere a créditos, subsidios o cofinanciamientos, provenientes de algún fondo de vivienda de los trabajadores, institución financiera y/o institución gubernamental, destinado a la compra de vivienda nueva, usada, mejoramientos, pago de pasivos, lotes con servicios, así como cofinanciamientos.

Una vivienda puede ser financiada por más de un organismo debido a la existencia de cofinanciamientos y subsidios ligados a créditos. Por ello, el número de acciones de financiamientos no equivale necesariamente al número de viviendas.

Algunas acciones de financiamiento no fueron consideradas para efectos estadísticos, pero sí su monto ejercido correspondiente.

El Crédito Individual equivale a una unidad de vivienda, no incluye acciones de financiamientos otorgados en cofinanciamiento y subsidios.

a/ Comprende financiamientos que incorporan más de una acción (créditos y subsidios) para una misma operación.

b/ Se refiere a viviendas en ampliación y rehabilitación.

c/ Comprende créditos y subsidios para pago de pasivos y lotes con servicios.

d/ Incluye créditos a exempleados.

Nota: La información considera a la infraestructura hidráulica que forma parte del sistema de Monitoreo de las Principales Presas de México de la CONAGUA.

Los datos están referidos al último día de cada mes.

a/ Se refiere al nivel más alto que debe de alcanzar el agua en la presa, bajo cualquier condición.

b/ Se refiere al máximo nivel con que se puede operar la presa para satisfacer las demandas; coincide con la elevación de la cresta del vertedor en el caso de una estructura que derrama libremente; si se tienen compuertas, es el nivel superior de estas.

Nota: La población derechohabiente se refiere al conjunto de personas que por ley tienen derecho a recibir prestaciones en especie o en dinero por parte de las instituciones de seguridad social. Este grupo comprende a los asegurados directos o cotizantes, pensionados y a los familiares o beneficiarios de ambos.

Para las instituciones del IMSS e ISSSTE la información se presenta por municipio de atención y para las instituciones PEMEX, SEDENA y SEMAR se presenta por centro de trabajo.

Comprende asegurados, pensionados y a sus familiares dependientes. Las cifras de asegurados y pensionados son realizadas a partir de los registros administrativos del IMSS, mientras que las relativas a sus familiares corresponden a estimaciones determinadas con base en coeficientes familiares. Los coeficientes familiares corresponden al promedio del número de derechohabientes por familia y aplican al a/ número de trabajadores asegurados y de pensionados.

a/ Se refiere a la Secretaría de Salud de Veracruz.

Incluye 1 241 836 consultas externas otorgadas por el Instituto de Salud para el Bienestar, cuya desagregación por municipio se puede consultar en el cuadro 5.31.

Se refiere al evento de salida del paciente del servicio de hospitalización que implica la desocupación de una cama censable. Incluye altas por curación, mejoría, traslado a otra unidad hospitalaria, defunción, alta voluntaria o fuga. Excluye movimientos entre diferentes servicios dentro del mismo hospital.

Se refiere al registro de la muerte de pacientes, que al momento del deceso ocupaban una cama censable en el área de hospitalización de la institución; no se consideran como defunciones hospitalarias todas aquellas ocurridas antes del ingreso del paciente a dicha área.

e/ Comprende médicas y no médicas.

Nota: La información corresponde tanto a las fases permanentes como a las campañas intensivas de vacunación.

a/ Se refiere a la Secretaría de Salud de Veracruz.

b/ Bacilo de CalmetteGuérin. Previene tuberculosis.

c/ Previene difteria, tos ferina y tétanos.

d/ Previene infecciones por neumococo.

e/ Previene difteria, tos ferina, tétanos, poliomieltis, infecciones por Haemophilus influenzae b y hepatitis B.

f/ Previene diarrea por rotavirus.

g/ Previene poliomieltis.

h/ Previene sarampión y rubéola.

i/ Previene sarampión, rubéola y parotiditis

j/ Previene el virus del papiloma humano.

Comprenden los biológicos: antineumocócica de polisacáridos 23 serotipos, antirrotavirus monovalente (RV1), antihepatitis A, biológicos de antialacrán, contra COVID19, gammaglobulina, informe especializado VIH biológicos, meningocócica, PPD (prueba de derivado k/ proteico purificado), Tdpa (contra tétanos, difteria y pertussis acelular) y otros.

a/ Se refiere a la persona que en general ha probado drogas motivada por la curiosidad, pero que no se ha sentido impulsada a repetir la experiencia.

b/ Se refiere a la persona que utiliza drogas en un contexto social, en donde el resto del grupo las consume. Sin embargo, no se siente interesado en repetir la experiencia fuera de ese medio, ni lo hace frecuentemente.

c/ Se refiere al consumidor que utiliza drogas con frecuencia, ya que ha desarrollado condición de dependencia de algún tipo, pero se desenvuelve en su medio familiar, laboral, escolar y social sin que dicho consumo le provoque conflictos.

d/ Se refiere a la persona que no solo utiliza las drogas con frecuencia, sino que su vida gira en torno al consumo, lo que se hace evidente por los problemas en relación con su medio, por las consecuencias que la droga produce en su organismo y funciones mentales.

e/ Se refiere a la persona que ha dejado de utilizar drogas por un tiempo no menor de un mes.

f/ Se refiere a la persona que consume alcohol y tabaco.

Servicios otorgados en establecimientos particulares de salud con servicio de hospitalización según número de camas censables

Cuadro 5.26

2021

| Concepto | Total | 1 a 4 camas | 5 a 9 camas | 10 a 14 camas | 15 a 24 camas | 25 a 49 camas | 50 y más camas |
|----------|-------|-------------|-------------|------------------|------------------|------------------|-------------------|
|----------|-------|-------------|-------------|------------------|------------------|------------------|-------------------|

Se refiere al evento de salida del paciente del servicio de hospitalización que implica la desocupación de una cama censable. Incluye altas por curación, mejoría, traslado a otra unidad hospitalaria, defunción, alta voluntaria o fuga. Excluye movimientos entre diferentes servicios dentro del mismo hospital.

Se refiere al registro de la muerte de pacientes, que al momento del deceso ocupaban una cama censable en el área de hospitalización de la institución; no se consideran como defunciones hospitalarias todas aquellas ocurridas antes del ingreso del paciente a dicha área.

Comprende nacidos vivos de partos y de cesáreas.

Comprende primera vez y subsecuentes.

Nota: La información comprende los sostenimientos público y privado. Incluye el nivel de licencia profesional.

Para algunos casos se observa un mayor número de alumnos titulados al de egresados, debido a que los titulados egresaron en ciclos escolares anteriores; asimismo, para algunos casos se registran datos distintos a cero en alumnos inscritos y para egresados y/o titulados con ceros, debido al registro de carreras de nueva creación.

Nota: La información comprende los sostenimientos público y privado de los niveles licenciatura normal, universitaria y tecnológica.

Para algunos casos se observa un mayor número de alumnos egresados al de inscritos y de titulados al de egresados, debido a que los egresados o titulados se registraron como inscritos o egresados en ciclos escolares anteriores; asimismo, para algunos casos se

registran datos distintos a cero en alumnos inscritos y para egresados v/o titulados con ceros, debido al registro de carreras de nueva

Nota: La información comprende los sostenimientos público y privado.

Para algunos casos se observa un mayor número de alumnos egresados al de inscritos, debido a que los egresados se registraron como inscritos en ciclos anteriores y de graduados al de egresados debido a que los graduados egresaron en ciclos escolares anteriores; asimismo, se registran ceros en alumnos inscritos y datos distintos a cero en egresados y graduados, debido a la liquidación o latencia de algunos posgrados en determinados campos de formación académica. Además, se registran datos distintos a cero en alumnos inscritos y para egresados y/o graduados con ceros, debido al registro de posgrados de nueva creación.

Nota: La información comprende los sostenimientos público y privado de los niveles licenciatura normal, universitaria y tecnológica.

Para algunos casos se observa un mayor número de alumnos egresados al de inscritos y de titulados al de egresados, debido a que los egresados o titulados se registraron como inscritos o egresados en ciclos escolares anteriores; asimismo, para algunos casos se registran datos distintos a cero en alumnos inscritos y para egresados y/o titulados con ceros, debido al registro de carreras de nueva

Nota: La información comprende los sostenimientos público y privado.

Para algunos casos se observa un mayor número de alumnos egresados al de inscritos, debido a que los egresados se registraron como inscritos en ciclos anteriores y de graduados al de egresados debido a que los graduados egresaron en ciclos escolares anteriores; asimismo, se registran ceros en alumnos inscritos y datos distintos a cero en egresados y graduados, debido a la liquidación o latencia de algunos posgrados en determinados campos de formación académica. Además, se registran datos distintos a cero en alumnos inscritos y para egresados y/o graduados con ceros, debido al registro de posgrados de nueva creación.

Nota: La información considera a los alumnos atendidos en los Centros de Atención Múltiple (CAM) y Unidades de Servicio de Apoyo a la Educación Regular (USAER). Solamente se contabiliza a los alumnos que presentan alguna discapacidad o aptitudes sobresalientes.

a/ Comprende diversidad social, cultural o lingüística.

b/ Alumnos atendidos solo en los Centros de Atención Múltiple.

c/ Se refiere a los alumnos inscritos en escuela regular de educación básica o capacitación para el trabajo, que reciben apoyo adicional en el Centro de Atención Múltiple o en horario alterno; esta ayuda puede ser proporcionada directamente en las escuelas de educación regular o bien, en las instalaciones del CAM.

Nota: La educación para adultos está destinada a individuos de 15 o más años que no saben leer o escribir, o que no han cursado o concluido la educación primaria o secundaria.

a/ Se refiere a los que fueron atendidos durante todo el año; es el resultado de sumar al número de educandos activos que continuaron del año anterior, los inscritos en el año en curso y descontar los que se inactivaron.

b/ Comprende a las personas que al final de un proceso educativo demuestran, mediante la acreditación del examen final del módulo "La palabra" en la vertiente hispanohablante que es capaz de comprender, producir y usar convenciones básicas del lenguaje escrito, y las nociones elementales de matemáticas.

c/ Se refiere a la figura solidaria que facilita el aprendizaje de la lectura, escritura y las matemáticas básicas en el nivel inicial. Aplica el ejercicio diagnóstico y las evaluaciones formativas.

Nota: La información considera instalaciones públicas que cuentan con áreas o espacios deportivos formales, permanentes y en uso. Comprende: centros deportivos, complejos deportivos, módulos deportivos, y unidades deportivas. Excluye centros deportivos especializados, centros de talentos deportivos y polideportivos.

La variación que se presenta con respecto a la edición anterior, es debido a que los Comites Municipales del Deporte (COMUDE) depuraron y actualizaron los registros administrativos de sus reportes de existencia de instalaciones deportivas.

Nota: Las estimaciones que aparecen en este cuadro están identificadas con una llamada de acuerdo con su nivel de precisión, en Moderado y Bajo, tomando como referencia el coeficiente de variación CV (%). Una precisión Baja requiere un uso cauteloso de la estimación en el que se analicen las causas de la alta variabilidad y se consideren otros indicadores de precisión y confiabilidad, como el intervalo de confianza. Las estimaciones sin llamada tienen precisión Alta.

Población de 18 años y más que tuvo contacto con algún servidor público y que sufrió algún acto de corrupción por sexo según condición de denuncia ante alguna autoridad
2021 E/

Cuadro 8.7

| Sexo | Total | Población víctima de actos de corrupción | Población que no denunció ante alguna autoridad | |
|--------------|------------------|--|---|-----------|
| | | | Población | Relativo |
| Total | 1 393 345 | 235 466 | 204 404 | 87 |
| Hombres | 645 479 | 145 477 | 128 825 | 89 |
| Mujeres | 747 866 | 89 989 | 75 579 | 84 |

Nota: Las estimaciones que aparecen en este cuadro están identificadas con una llamada de acuerdo con su nivel de precisión, en Moderado y Bajo, tomando como referencia el coeficiente de variación CV (%). Una precisión Baja requiere un uso cauteloso de la estimación en el que se analicen las causas de la alta variabilidad y se consideren otros indicadores de precisión y confiabilidad, como el intervalo de confianza. Las estimaciones sin llamada tienen precisión Alta.

Nivel de precisión de las estimaciones:

Alto, CV en el rango de 0 a 15, no incluye extremos 0 y 15

Moderado, CV en el rango de 15 a 30, incluye extremo 15 hasta menos de 30

Bajo, CV de 30% en adelante. La información se refiere a la población de 18 años y más que habita en áreas urbanas de cien mil habitantes y más que realizó al menos un trámite, pago, solicitud de servicio o cualquier tipo de contacto presencial con un servidor público. Dicha población se le define como "Usuarios" de trámites, pagos y solicitudes de servicios públicos.

| Total | 5 782 300 | 2 617 539 | 3 164 761 |
| Población de 18 años y más víctima del delito a/ | 844 331 | 375 904 | 468 427 |
| Robo total o parcial de vehículo b/ | 161 340 c/ | 94 693 c/ | 66 647 d/ |
| Robo o asalto en calle o transporte público e/ | 143 589 c/ | 72 670 d/ | 70 919 d/ |
| Fraude f/ | 178 392 c/ | 79 577 d/ | 98 815 d/ |
| Extorsión | 180 035 | 91 913 c/ | 88 122 c/ |
| Robo en casa habitación b/ | 195 616 c/ | 78 031 c/ | 117 585 d/ |
| Amenazas verbales | 102 291 c/ | 32 622 c/ | 69 669 d/ |
| Otros delitos distintos a los anteriores g/ | 45 535 c/ | 6 133 d/ | 39 402 d/ |
| Robo en forma distinta a las anteriores h/ | 36 583 c/ | 23 961 c/ | 12 622 d/ |
| Lesiones | 29 665 c/ | 16 822 d/ | 12 843 d/ |

Las estimaciones que aparecen en este cuadro están indicadas de acuerdo con su nivel de precisión, en Alto, Moderado y Bajo, tomando como referencia el coeficiente de variación CV (%). Una precisión Baja requiere un uso cauteloso de la estimación en el que se analicen las causas de la alta variabilidad y se consideren otros indicadores de precisión y confiabilidad, como el intervalo de confianza.

Nota: Nivel de precisión de las estimaciones:

Alto, CV en el rango de 0 a 15, no incluye extremos 0 y 15

Moderado, CV en el rango de 15 a 30, incluye extremo 15 hasta menos de 30

Bajo, CV de 30% en adelante

En el cuadro, los valores que se presentan corresponden al valor Alto, excepto los casos Moderado y Medio que se indican con llamadas.

La suma de víctimas de los delitos no coincide con el total de población víctima del delito debido a que las personas pudieron ser víctimas a/ de más de un delito.

De conformidad a las prácticas internacionales, la estimación para los delitos de robo total de vehículo y robo de accesorios, refacciones o b/ herramientas de vehículos y robo en casa habitación, se generó a partir del factor de expansión hogar por tratarse de delitos del hogar.

c/ Moderado, CV en el rango de 15 a 30, incluye extremo 15 hasta menos de 30.

d/ Bajo, CV de 30% en adelante.

e/ Incluye robo relacionado con una visita a un banco o cajero automático.

Incluye fraude bancario (dinero falso o uso de chequera, número de tarjeta o cuenta bancaria para hacer cargos o extraer dinero) y fraude f/ al consumidor (entrega de dinero por un producto o servicio que no se recibió conforme a lo acordado).

Incluye secuestro o secuestro exprés, delitos sexuales, tales como hostigamiento, manoseo, exhibicionismo, intento de violación y g/ violación sexual.

h/ Incluye carterismo.

Unidades económicas víctimas de algún delito por tipo de delito
2020 E/

Cuadro 9.2

| Delito | Total |
|---|----------------|
| Total | 291 256 |
| Robo hormiga | 20 204 |
| Robo/asalto de bienes o dinero a/ | 25 971 |
| Extorsión | 32 134 |
| Robo de mercancía en tránsito | 8 906 |
| Actos de corrupción | 10 844 |
| Fraude b/ | 15 669 |
| Robo total o parcial de vehículo c/d/ | 5 962 |
| Daños a instalaciones, maquinaria o equipo e/ | 825 |
| Otros delitos e/f/ | 1 289 |

Las estimaciones que aparecen en este cuadro están indicadas de acuerdo con su nivel de precisión, en Alto, Moderado y Bajo, tomando como referencia el coeficiente de variación CV (%). Una precisión Baja requiere un uso cauteloso de la estimación en el que se analicen las causas de la alta variabilidad y se consideren otros indicadores de precisión y confiabilidad, como el intervalo de confianza.

Nivel de precisión de las estimaciones:

Nota:

Alto, CV en el rango de 0 a 20, no incluye extremos 0 y 20

Moderado, CV en el rango de 20 a 30, incluye extremo 20 hasta menos de 30

Bajo, CV de 30% en adelante

En el cuadro, los valores que se presentan corresponden al valor Alto, excepto los casos Moderado y Bajo que se indican con llamadas.

La suma de las víctimas no coincide con el total de unidades económicas porque no todas las unidades económicas fueron víctimas de algún delito; tampoco es correcto sumar las unidades económicas que fueron víctimas de los distintos delitos para obtener el total de víctimas ya que las unidades económicas pudieron ser víctimas de más de un delito y de diferentes tipos de delitos.

a/ Incluye el robo o asalto de mercancías, dinero, insumos o bienes propiedad de la unidad.

b/ Incluye fraude bancario y fraude al consumo del establecimiento.

c/ Incluye el robo total de vehículo y el robo de accesorios de vehículo.

d/ Moderado, CV en el rango de 20 a 30, incluye extremo 20 hasta menos de 30.

e/ Bajo, CV de 30% en adelante.

f/ Incluye los cuatro delitos que presentaron menor prevalencia a nivel nacional.

| No especificado | 6 062 | 2 335 | 0 | 2 127 | 1 600 |

Nota: Los datos absolutos de las encuestas en hogares se ajustan siempre a proyecciones demográficas, no solo con la finalidad de tener un referente poblacional en periodos intercensales, sino también para eliminar las fluctuaciones en los datos estimados que son inherentes a los esquemas de muestreo probabilístico propios de estas encuestas, lo que facilita las comparaciones en el tiempo. Las proyecciones se actualizan cada vez que se tienen nuevos datos de población; en este contexto, el *Censo de Población y Vivienda 2020*, al proporcionar información sobre la magnitud y la distribución de la población en el país, obliga a llevar a cabo una conciliación demográfica, que permite a su vez, elaborar las proyecciones de población oficiales para el país, con las que es posible expandir los datos que provienen de las encuestas en hogares. Por lo anterior, los datos de la ENOEN que ahora se presentan a escala nacional, para cuatro tamaños de localidad, por entidad federativa y por ciudad autorrepresentada, corresponden a la estimación de población realizada por el INEGI, con base en las estimaciones trimestrales de población que genera el Marco de Muestreo de Viviendas del INEGI. Para cualquier aclaración remitirse a la fuente indicada a pie de cuadro.

Los indicadores de la *Encuesta Nacional de Ocupación y Empleo Nueva Edición (ENOEN)* están ajustados al *Censo de Población y Vivienda 2020*. Para facilitar su comparación, el Instituto ajustó los factores de expansión de las bases de datos trimestrales desde 2010 y generó los resultados, sustituyendo los que contenían información provisional ajustada que corresponden a la estimación de población realizada por el INEGI, con base en las estimaciones trimestrales de población que genera el Marco de Muestreo de

Nota: Viviendas del INEGI. Para cualquier aclaración remitirse a la fuente indicada a pie de cuadro.

a/ Se clasifican en este rubro, tanto los trabajadores dependientes no remunerados como los trabajadores por cuenta propia dedicados a las actividades agrícolas de subsistencia.

b/ Se limita exclusivamente al hecho de que el trabajo o actividad económica que realizan las personas les dé acceso o no a los servicios de salud que preste una institución, pública o privada. Si tienen acceso a dichos servicios por medio de un pariente que los declara como dependientes económicos o por la adquisición del seguro popular, no se clasifican en la categoría "con acceso".

c/ En lo referente a este rubro los criterios de clasificación cambian en la *Encuesta Nacional de Ocupación y Empleo (ENOE)* con respecto a su antecesora, la *Encuesta Nacional de Empleo (ENE)*: los límites superiores de las unidades económicas medianas se extienden hasta 250 empleados siendo, por ende, 251 el límite inferior de ahora en adelante para las grandes, ello en conformidad con la *Ley para el Desarrollo de la Competitividad de la Micro, Pequeña y Mediana Empresa*. En paralelo fuentes de trabajo que imparten servicios públicos tales como escuelas, hospitales, clínicas y dispensarios médicos dejan de clasificarse automáticamente en función del organismo de pertenencia (SEP, IMSS, ISSSTE, DIF, SSA), es decir, como unidades económicas grandes, tal y como se hacía en la ENE, de modo que con la ENOE se redistribuyen en unidades pequeñas, medianas o incluso grandes, si es el caso, pero ahora sólo en función del personal que labora en el establecimiento donde el individuo encuestado desarrolla sus actividades.

d/ Comprende: escuelas privadas que imparten educación formal, hospitales, clínicas, instituciones asistenciales e instituciones con fines no lucrativos así como, en general, cualquier otra que opere bajo la denominación de asociación civil.

e/ Comprende: poder judicial, poder legislativo, instituciones autónomas de educación superior, así como otras de interés público y de carácter no educativo (INE, Comisión Nacional de los Derechos Humanos y partidos políticos).

Indicadores estratégicos de ocupación y empleo según sexo

Trimestres enero a marzo y abril a junio de 2022

| Indicador | Total | | Hombres | | Mujeres | |
|-----------|---------------|---------------|---------------|---------------|---------------|---------------|
| | Enero a marzo | Abril a junio | Enero a marzo | Abril a junio | Enero a marzo | Abril a junio |

f/ Comprende a los ocupados en unidades económicas cuya territorialidad no forma parte del país en un sentido jurídico; tal es el caso de los trabajadores transfronterizos residentes en México, así como del personal que labora en embajadas y consulados. Por otra parte, también se incluyen aquellos casos en los que no se pudo definir su ubicación en términos de la naturaleza que guarda la unidad económica.

g/ Se consideran "personas con interés para trabajar, pero bajo un contexto que les impide hacerlo" aquellas que son explícitas en cuanto a que nadie más en el hogar se hace cargo de los niños pequeños, enfermos o ancianos, o porque algún familiar les prohíbe trabajar o también por algún impedimento físico de carácter temporal (embarazo difícil o avanzado, convalecencia de una enfermedad o accidente).

Nota: El Subprograma Capacitación para la Empleabilidad apoya a personas de 18 años o más de todo el país, buscadores de empleo, con el objetivo de que se incorporen a cursos de capacitación para el trabajo, a través de los cuales adquieren o fortalecen sus conocimientos y habilidades, a efecto de favorecer su acceso o permanencia en un empleo o el desarrollo de una actividad productiva por cuenta propia. La capacitación y apoyo a los Solicitantes de empleo seleccionados se implementa a través de la impartición de cursos en dos modalidades, en la empresa y en aula.

a/ Se refiere a becarios egresados.

Nota: Se excluyen las acciones de vinculación del Programa de Empleo Temporal (PET).

a/ Se refiere a los servicios realizados a los buscadores de empleo que hayan implicado su registro (primera vez), modificación o búsqueda de ofertas de empleo en la Bolsa de Trabajo, llevados a cabo por consejeros laborales desde el Sistema Integral de Información del Servicio Nacional de Empleo (SIISNE). Un buscador de empleo puede tener a lo más una atención al día estadísticamente.

b/ Se refiere al número de puestos de trabajo asociados a una vacante registrada en la Bolsa de Trabajo con el fin de que les sean enviados solicitantes de empleo acordes con los perfiles laborales demandados. El número de vacantes captadas puede ser mayor al de envíos a cubrir una vacante, debido a que no todos los buscadores de empleo reúnen los requisitos solicitados en la oferta de empleo o por falta de interés del solicitante de empleo.

c/ Se refiere al número de envíos de solicitantes de empleo a vacantes de trabajo por parte de los consejeros laborales. Una persona puede tener más de un envío en un mismo periodo de tiempo.

d/ Se refiere a la contratación como resultado del envío de un solicitante de empleo a una vacante por parte de un consejero laboral. Una persona puede tener más de una colocación en un mismo periodo de tiempo.

Nota: La información comprende aseguramiento permanente y eventual.

a/ A partir del año 2017, la población de trabajadores bajo seguro de riesgos de trabajo, se calcula con base en el promedio mensual de asegurados reportados en las modalidades que otorgan prestaciones económicas para ese ramo de seguro. Promedio enero - diciembre de cada año.

b/ Se refiere a casos de riesgos de trabajo terminados; un riesgo de trabajo es terminado después de que se aceptó como tal y de que el trabajador es dado de alta médica y administrativamente. Un accidente o enfermedad de trabajo se considera terminado cuando el trabajador es dado de alta, después de otorgarle las prestaciones en especie y en dinero a que tiene derecho, excepto cuando fallece son proporcionadas en forma mediata al deceso; específicamente para los de incapacidad permanente, se incluyen casos por riesgos de trabajo de años anteriores.

c/ Se refiere a la sumatoria de días de casos de riesgos de trabajo terminados en los que se pagaron incapacidades temporales.

Nota: La información corresponde a eventos de jurisdicción local registrados ante las Juntas Locales de Conciliación y Arbitraje, Centros de Conciliación Laboral Local y Tribunales Laborales Locales mismas que la proporcionan al INEGI para su tratamiento y posterior difusión.

a/ En algunos casos, incluye la solución de los emplazamientos a huelga registrados en años anteriores.

Fuente: INEGI. *Estadísticas sobre relaciones laborales de jurisdicción local*.

**Motivos de los emplazamientos a huelga y de las huelgas estalladas por tipo de emplazamiento
2021**

Cuadro 10.23

| Tipo | Motivos de los emplazamientos a huelga | Motivos de las huelgas estalladas |
|---|--|-----------------------------------|
| Total | 324 | 0 |
| Firma de contrato | 189 | 0 |
| Revisión de contrato | 52 | 0 |
| Incumplimiento de contrato | 9 | 0 |
| Revisión de salario | 72 | 0 |
| Desequilibrio entre los factores de la producción | 2 | 0 |

Nota: La información corresponde a eventos de jurisdicción local registrados ante las Juntas Locales de Conciliación y Arbitraje, Centros de Conciliación Laboral Local y Tribunales Laborales Locales mismas que la proporcionan al INEGI para su tratamiento y posterior difusión.

El total de motivos de emplazamientos a huelga es mayor al total de emplazamientos de los dos cuadros anteriores, debido a que puede haber emplazamientos que se presentaron por dos o más motivos.

**Emplazamientos a huelga solucionados por sector de actividad económica
según forma de solución
2021**

Cuadro 10.24

| | Total | Convenio | Desisti- miento | Allanamien- to al pliego de peticio- nes | No cumplir artículo 927-II | No cumplir artículo 923 | Otras |
|------------------|-------|----------|--------------------|---|-------------------------------|----------------------------|-------|
| Sector económico | | | | a/ | b/ | c/ | |

Nota: La información corresponde a eventos de jurisdicción local registrados ante las Juntas Locales de Conciliación y Arbitraje, Centros de Conciliación Laboral Local y Tribunales Laborales Locales mismas que la proporcionan al INEGI para su tratamiento y posterior difusión.

En algunos casos, incluye la solución de los emplazamientos a huelga registrados en años anteriores.

La sectorización de actividad preponderante, fue establecida con base en el *Sistema de Clasificación Industrial de América del Norte, México SCIAN 2013*.

a/ Se refiere al reconocimiento total por parte del patrón, a las peticiones contenidas en el emplazamiento a huelga.

b/ Se refiere a que el sindicato no acudió a la audiencia de conciliación (Ley Federal del Trabajo vigente).

c/ Se refiere a que no se cumplieron requisitos para emplazar a huelga (Ley Federal del Trabajo vigente).

a/ Se refiere al área que nunca ha tenido riego disponible, donde se establece infraestructura (pozo, canal u otra fuente de agua) que permita disponer de agua para el crecimiento de los cultivos.

b/ Se refiere a la superficie donde se realiza el conjunto de actividades que tienen como propósito restituir (habilitar de nuevo) las obras hidroagrícolas a su estado original (condiciones de diseño y proyecto) con el propósito de asegurar las condiciones estructurales y/o funcionales de las obras hidroagrícolas para su uso pleno, la eficiencia en el uso del agua y la calidad en el servicio de riego. En el contexto del Programa de Rehabilitación, Modernización, Tecnificación y Equipamiento de Distritos y Unidades de Riego son todas aquellas acciones que tienen como resultado mantener la seguridad física y operativa de la infraestructura desde la obra de captación (obra de cabeza) hasta la red de distribución y regaderas (antes de la aplicación del riego a la planta).

Nota: La producción de miel se refiere a los volúmenes obtenidos de los colmenares durante las distintas cosechas que se realizan en el año. La medición se realiza de acuerdo con el rendimiento medio de las cajas rústicas y modernas donde se alojan las colonias de abejas. La cera es un subproducto obtenido en el proceso de beneficio de la miel y su producción varía de acuerdo con la proporción que se encuentre en los colmenares con respecto a la de miel.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

Nota: La información que se presenta corresponde a los centros de sacrificio de especies pecuarias que cuentan con registro autorizado federal, estatal o municipal. Los centros de sacrificio municipales son administrados por este nivel de gobierno. La capacidad instalada de sacrificio de especies pecuarias, se refiere al número máximo de animales que se pueden sacrificar en un mes, de acuerdo a la infraestructura e instalaciones con las que cuenta cada uno de los centros de sacrificio. Datos referidos al 31 de diciembre de cada año.

a/ Se refiere al pollo y gallina pesada o ligera que ha finalizado su ciclo productivo.

b/ En México, se sacrifica este ganado solo para la exportación de su carne.

Nota: En algunos municipios, tanto algunas especies descritas son diferentes, como el volumen de la producción forestal es mayor al volumen autorizado de aprovechamiento forestal, debido a que existen terrenos no forestales en los que se realiza el aprovechamiento de recursos forestales para los que no se expide la autorización para la explotación forestal. Para esos casos la procedencia legal es amparada mediante una constancia de verificación para el aprovechamiento de recursos forestales que provengan de terrenos diversos a los forestales.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

a/ Comprende: Caoba (*Swietenia macrophylla*) y Cedro Rojo (*Cedrela odorata*).

b/ Comprende: Cedro Rosado (*Acrocarpus fraxinifolius*), Ceiba (*Ceiba pentandra*), Eucalipto (*Eucalyptus urophylla*), Guanacastle (*Enterolobium cyclocarpum*), Hule (*Hevea brasiliensis*), Marangola (*Clethra mexicana DC*), Nogal (*Juglans regia L*), Primavera (*Tabebuia donnell smithii*), Palo de Rosa (*Tabebuia rosea*), Teca (*Tectona grandis*) y otros.

c/ Se refiere a: *Pinus ayacahuite*, *Pinus greggii*, *Pinus hartwegii*, *Pinus leiophylla*, *Pinus montezumae*, *Pinus oaxacana*, *Pinus oocarpa*, *Pinus patula*, *Pinus pseudostrabus*, *Pinus rudis* y otros.

d/ Se refiere a *Abies religiosa*.

e/ Comprende Ciprés (*Cupressus lindleyi*), (*Cupressus spp*) y Sabino (*Juniperus deppeana*).

f/ Se refiere a: *Quercus acutifolia*, *Quercus crassifolia*, *Quercus crassipes*, *Quercus Laurina*, *Quercus leiophylla*, *Quercus rugosa* y *Quercus xalapensis*.

g/ Comprende: Ilite (*Alnus acuminata*), (*Alnus firmifolia*), (*Alnus jorullensis*), Liquidámbar (*Liquidambar macrophylla*), (*Liquidambar styraciflua*) y Madroño (*Arbutus xalapensis*).

Nota:

La producción pesquera se presenta en peso desembarcado mediante avisos de arribo. Este peso desembarcado incluye el proceso de descabezado, pelado, fileteado, eviscerado y desconchado, entre otros; para realizar una comparación del total de la producción se aplica un factor de conversión de peso desembarcado a peso vivo; este factor tiene la finalidad de completar el animal y en algunos casos este puede ser menor al peso desembarcado e incluso reportar "0" debido a que la parte presentada ya ha sido considerada en alguna otra presentación de la misma especie.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

Nota: Las embarcaciones reportadas corresponden a las registradas en la entidad; sin embargo, por cuestiones de operación y permisos de pesca, éstas pueden capturar en todo el litoral mexicano y no es obligatorio reportar la producción en el lugar de registro, sino en el sitio donde desembarcan.

Datos referidos al 31 de diciembre de cada año.

a/ Comprende embarcaciones atuneras cerqueras, vareras y acondicionadas o modificadas para palangre.

b/ Se refiere a embarcaciones con eslora menor o igual a 10 metros y cuya actividad principal es la pesca comercial.

a/ Mineral para construcción.

b/ Mineral para construcción. Cifras calculadas con base al consumo de cemento y cal.

c/ Se refiere a carbonato de calcio.

d/ Mineral para construcción. Cifras calculadas con base al consumo de cemento.

e/ Comprende mármol, granito y marmolina.

Nota: Los datos corresponden al tamaño de la muestra no probabilística para las 239 clases a nivel de entidad de la *Encuesta Mensual de la Industria Manufacturera*, es decir, al número de establecimientos que, de acuerdo con los que proporcionaron información en 2013, generan el 97.33%, aproximadamente, de los ingresos del sector. La Encuesta incluye las actividades relativas a maquila de exportación.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

a/ Excluye al personal que cobra exclusivamente por honorarios y comisiones.

**Principales características de las empresas constructoras
Serie anual de 2015 a 2021**

Cuadro 18.1

| Año | Personal ocupado (Promedio mensual) | Remuneraciones (Miles de pesos) a/ | Valor de producción de las empresas ubicadas en la entidad (Miles de pesos) b/ | Valor de producción generado en la entidad (Miles de pesos) c/ | Valor de los gastos (Miles de pesos) d/ | Valor de los ingresos (Miles de pesos) e/ |
|------|-------------------------------------|------------------------------------|--|--|---|---|
| 2015 | 33 699 | 2 629 484 | 12 255 377 | 20 672 456 | 12 423 346 | 30 265 592 |
| 2016 | 29 092 | 2 352 770 | 13 718 674 | 19 807 012 | 12 773 037 | 23 991 851 |
| 2017 | 29 623 | 2 672 849 | 19 492 319 | 14 519 188 | 13 559 519 | 23 472 405 |
| 2018 | 23 965 | 2 009 312 | 23 084 930 | 17 605 740 | 13 672 725 | 33 141 114 |
| 2019 | 29 649 | 2 756 921 | 26 827 494 | 23 331 117 | 14 514 931 | 26 617 666 |
| 2020 | 31 598 | 3 261 913 | 15 442 063 | 17 835 109 | 10 934 491 | 16 312 653 |
| 2021 | 29 906 | 3 250 125 | 15 273 886 | 15 379 724 | 12 547 729 | 26 262 227 |

Nota: La información se genera con un esquema de muestreo probabilístico y estratificado, considera como variable de estratificación un componente principal conformado por el personal ocupado y el valor de la producción. El marco muestral utilizado se conformó del directorio de los *Censos Económicos 2014* correspondiente a todas las empresas clasificadas en el sector 23 Construcción en el *Sistema de Clasificación Industrial de América del Norte, México SCIAN 2013*.

Para los datos en miles de pesos las cifras están expresadas en valores corrientes.

- a/ Excluye: contribuciones patronales a regímenes de seguridad social, otras prestaciones sociales, utilidades repartidas a los trabajadores y pagos de indemnización o liquidación del personal. Las cifras están expresadas en valores corrientes.
- b/ Comprende el valor de producción generado por las empresas constructoras ubicadas en la entidad e incluye las obras realizadas, tanto en la entidad, como fuera de la misma.
- c/ Comprende el valor de producción generado en la entidad, independientemente de que las empresas constructoras se encuentren o no ubicadas en ella.
- d/ Comprende: compra de materiales como contratista principal y dados a subcontratistas, compra de materiales como subcontratista, materiales consumidos en la producción de activos fijos para uso propio, suministro de personal, pagos a subcontratistas, así como otros gastos en la ejecución de obras y servicios.
- e/ Comprende: prestación de servicios, ejecución de obras como contratista principal, ejecución de obras como subcontratista, administración o supervisión de obras, alquiler de bienes muebles e inmuebles, anticipos y otros ingresos por la ejecución de obras y servicios.

| Índice de las remuneraciones reales totales al por mayor | 100.0 | 100.8 | 105.3 | 108.8 | 110.5 | 118.8 | 112.9 | 116.1 | 120.4 | |
| Índice de las remuneraciones reales totales al por menor | 100.0 | 105.6 | 116.7 | 125.6 | 128.3 | 129.5 | 131.2 | 127.4 | 131.7 | |
| Índice de los ingresos por suministro de bienes | 100.0 | 104.4 | 108.3 | 110.5 | 108.3 | 108.1 | 108.9 | 98.2 | 107.8 | |
| Índice de los ingresos por suministro de bienes y servicios en términos reales al por menor a/ | 100.0 | 98.8 | 104.9 | 108.8 | 106.3 | 107.9 | 109.4 | 102.9 | 109.7 | |
| Índice de las mercancías compradas para su reventa en términos reales al por mayor b/ | 100.0 | 102.0 | 103.3 | 106.5 | 100.6 | 104.9 | 106.1 | 91.8 | 100.5 | |
| Índice de las mercancías compradas para su reventa en términos reales al por menor b/ | 100.0 | 98.1 | 103.5 | 107.0 | 104.2 | 107.8 | 107.2 | 104.0 | 112.5 | |

Nota: La información se refiere al promedio anual.

El índice del personal ocupado se obtuvo tomando como base el promedio del año 2013.

Los índices de remuneraciones reales por persona ocupada y de las remuneraciones reales totales, fueron deflactados con el índice nacional de precios al consumidor de la región Centro Sur, con base en la 2a quincena de julio 2018 = 100, pero referidos a 2013 y tomando como base el año de 2013.

Los ingresos por suministro de bienes y servicios para comercio al por mayor fueron deflactados con los Índices de Precios al Productor (IPP), y para comercio al por menor con los Índices Nacionales de Precios al Consumidor (INPC) de la región Centro Sur; se utilizó el IPP según la clasificación por origen de la producción de los bienes, con base en 2019=100; así como el INPC con base en la 2a quincena de julio 2018=100, pero referidos a 2013 y diferenciados por Rama de actividad comercial. Los indicadores al por mayor y al por menor se obtienen a través de la ponderación de relativos censales y tomando como base el año de 2013.

Las mercancías compradas para su reventa fueron deflactadas con el Índice de Precios Productor con servicios y sin petróleo, clasificación por origen de los bienes finales, con base en julio de 2019 = 100, pero referidos a 2013 y diferenciados por Rama de actividad.

a/ Se refiere a la suma de los ingresos por la venta de las mercancías adquiridas para su reventa propiedad del establecimiento, menos el importe de las devoluciones, descuentos y rebajas sobre ventas sin incluir el IVA, pero incluyendo cualquier otro impuesto que el establecimiento traslade al cliente, más los ingresos por comisión y consignación, más otros ingresos derivados de la actividad.

b/ Se refiere al valor de las mercancías que compró el establecimiento para venderlas en las mismas condiciones en que las adquirió, menos el importe de las devoluciones, descuentos y rebajas sobre compras sin incluir el IVA, pero incluyendo cualquier otro impuesto que haya sido trasladado al establecimiento por parte de sus proveedores.

Nota: El Programa de Abasto Social de Leche, a cargo de Liconsa, tiene como objetivo apoyar a las personas beneficiarias mediante el acceso al consumo de leche fortificada, de calidad y bajo precio. La población objetivo del programa se atiende a través de dos modalidades: abasto comunitario y convenios con actores sociales.

En municipios en extrema pobreza o marginación se otorga un precio preferencial de 2.50 pesos el litro de leche.

a/ Datos referidos al 31 de diciembre. Comprende: lecherías, tiendas particulares, infraestructura de distribución de Liconsa y centros de trabajo de Liconsa.

Puntos de atención, familias beneficiarias, beneficiarios, dotación anual e importe de la venta de leche fortificada del programa de abasto social Liconsa por municipio 2021

Cuadro 20.4

| Municipio | Puntos de atención a/ | Familias beneficiarias b/ | Beneficiarios b/ | Dotación anual de leche fortificada (Litros) | Importe de la venta de leche fortificada (Miles de pesos) |
|-----------|-----------------------|---------------------------|------------------|--|---|
|-----------|-----------------------|---------------------------|------------------|--|---|

b/ Datos referidos al 31 de diciembre. Se refiere a las personas pertenecientes a hogares cuyo ingreso está por debajo de la línea de bienestar y que pertenecen a cualquiera de los siguientes grupos: niñas y niños de 6 meses a 12 años de edad, mujeres y hombres adolescentes de 13 a 15 años, mujeres en periodo de gestación o lactancia, mujeres de 45 a 59 años, personas con enfermedades crónicas, personas con discapacidad, y personas adultas de 60 y más años; así como las personas en situación de vulnerabilidad atendidas por los actores sociales de acuerdo a las siguientes prioridades: personas que por diferentes situaciones están ingresadas en alguna institución pública o privada de asistencia social, personas que son apoyadas por instituciones privadas de asistencia social que suman esfuerzos con el gobierno a favor de la nutrición de las niñas y los niños, así como de la población objetivo, y personas atendidas por medio de instituciones de gobierno que por sus objetivos estratégicos, se coordinan entre sí para superar los rezagos socioeconómicos de algunos sectores de la población.

c/ Se refiere a Punto de venta que cerró el 27 de febrero de 2021.

d/ Se refiere al municipio de San Miguel Soyaltepec del Estado de Oaxaca de Juárez.

Nota: La información comprende los establecimientos localizados en las Áreas Geoestadísticas Básicas Turísticas, determinadas a partir de una serie de lineamientos o criterios definidos por la SECTUR y el INEGI, a partir de la información generada por los *Censos Económicos*, y que toman en cuenta tanto las clases de actividad características como conexas al turismo. En estas últimas se incluyen las actividades económicas que no tienen un vínculo directo con el turismo; por ejemplo, los restaurantes, el transporte, etc., donde los bienes o servicios son adquiridos tanto por visitantes como por los residentes del lugar.

Comprende: restaurantes con servicio de preparación de alimentos a la carta o de comida corrida, pescados y mariscos, autoservicio, *pizzas*, hamburguesas, *hot dogs* y pollos rostizados a/ para llevar, y otro tipo de alimentos para llevar.

Se refiere a los establecimientos dedicados principalmente a la preparación de alimentos como gelatinas, tamales, pasteles y pan casero, frituras y elotes, así como bebidas, para su b/ consumo inmediato en el mismo lugar o para llevar.

Se refiere al percance vial en el que resultan pérdidas de vidas humanas (muertos), puede haber heridos y consecuentemente daños materiales, estos pueden ser a la propiedad del Estado y/o particular. Es pertinente señalar, que el registro del evento se realiza en el lugar del suceso, por lo que si una persona herida fallece posteriormente, quedó registrada como herida.

Se refiere al accidente de tránsito en el que no se presenta pérdida de vidas humanas, pero sí lesionados (heridos), así como posibles daños materiales.

Se refiere al evento vial en el que únicamente se presentan daños materiales a vehículos, propiedades particulares y/o del Estado, tales como postes, guarniciones, señalizaciones, etcétera.

| Servicios de comunicación | 906 | 4 641 |
| Telegrama g/ | 906 | 4 641 |
| Fax | 0 | 0 |

Nota: La información considera únicamente los servicios facturados.

Excluye las transmisiones correspondientes a giros internacionales, programas sociales, pago de nóminas y pensiones, y telegramas de grandes usuarios ya que se concentran y realizan a a/ nivel central. Las transferencias al extranjero (*out bound*) sí se transmiten a nivel de sucursal telegráfica.

b/ Se refiere a las transferencias de dinero y pagos de servicios asociados al giro telegráfico. Los giros transferidos son conocidos como expedidos, y los recibidos como pagados.

Se refiere al servicio que se ofrece a entidades del Gobierno Federal para el pago de los beneficios económicos de programas sociales, en sucursales telegráficas y puntos temporales de pago, conforme al padrón que se especifique.

d/ Se refiere al servicio que se ofrece a empresas públicas y privadas para pagar a su personal, en sucursales telegráficas, sueldos, pensiones y comisiones.

e/ Se refiere al servicio que se ofrece a empresas públicas y privadas para recibir, en sucursales telegráficas, los pagos que sus clientes realizan por productos o servicios adquiridos.

f/ Se refiere a los servicios financieros básicos que se operan con los bancos.

b/ Se refiere al derecho otorgado a los Poderes de la Unión, Estados, órganos de Gobierno de la Ciudad de México, municipios, órganos constitucionales autónomos, e instituciones de educación superior de carácter público para proveer servicios de telecomunicaciones y radiodifusión sin fines de lucro para el cumplimiento de sus atribuciones.

c/ Se refiere al derecho otorgado a personas físicas o morales de nacionalidad mexicana para prestar servicios públicos de telecomunicaciones y radiodifusión con propósitos culturales, científicos, educativos o a la comunidad, sin fines de lucro. Quedan comprendidas en esta categoría las concesiones comunitarias y las indígenas; así como las otorgadas a instituciones de educación superior de carácter privado.

Puntos de servicio postal, personal ocupado, correspondencia expedida y recibida por municipio

Cuadro 22.41

2021

| Municipio | Puntos de servicio postal a/ | Personal ocupado | Correspondencia expedida (Miles de piezas) b/ | | | | Correspondencia recibida (Miles de piezas) | | | |
|-----------|---------------------------------|------------------|---|-------------------|----|------------------------|--|-------|-------------------|----|
| | | | Total | Servicio nacional | c/ | Servicio internacional | d/ | Total | Servicio nacional | c/ |

Nota: Para puntos de servicio postal y personal ocupado los datos están referidos al 31 de diciembre. Existen municipios que reportan puntos de servicio postal sin personal ocupado debido a que se trata de agencias o expendios propiedad de terceros, cuyo personal no pertenece a Correos de México; en algunos de estos municipios tampoco se registran movimientos de piezas postales, ya que estos se contabilizan centralmente en administraciones y sucursales de otros municipios. Debido al redondeo de las cifras, para correspondencia expedida y recibida la suma de los parciales puede o no coincidir con los totales.

Comprende: administraciones, sucursales, agencias, expendios ubicados en pequeños comercios y de instituciones públicas, centros de depósito masivos, oficinas de servicios directos, a/ centros de atención integral, centros de reparto y centros de operación regional.

b/ Corresponde a la facturada en la entidad federativa.

c/ Comprende: cartas y tarjetas, publicaciones periódicas, propaganda comercial, impresos, franquicia y bultos postales.

d/ Comprende: cartas y tarjetas, impresos, encomiendas postales y pequeños paquetes.

Ingresos y gastos totales en las oficinas de correos

Cuadro 22.42

Serie anual de 2016 a 2021**(Miles de pesos)**

| Año | Ingresos totales a/ | Gastos totales b/ |
|------|---------------------|-------------------|
| 2016 | 47 786 | 226 869 |
| 2017 | 41 223 | 196 221 |
| 2018 | 46 464 | 201 828 |
| 2019 | 37 743 | 199 357 |
| 2020 | 34 549 | 212 644 |
| 2021 | 41 040 | 200 320 |

a/ Comprende el total de ingresos por facturación en el año, e incluye el Impuesto al Valor Agregado (IVA).

Comprende remuneraciones totales al personal ocupado, gastos de materiales y suministros, así como gastos de servicios generales. Los gastos de materiales y suministros y de servicios generales, solo corresponden a gastos menores pagados de manera local, dado que la mayoría se erogan de manera centralizada en la Ciudad de México.

Nota: La recaudación fiscal neta se compone por los ingresos menos las devoluciones. En la entidad se integra de acuerdo al domicilio fiscal y no incluye todas las deducciones a que tienen derecho los contribuyentes. Incluye la información de los cuentadantes de la Federación. A partir de 2015 se modificó el criterio para obtener la recaudación neta, disminuyendo de manera adicional las compensaciones, de acuerdo a los términos del Estado Analítico de Ingresos de la Cuenta de la Hacienda Pública Federal.

a/ En este impuesto se encuentran incluidos los pagos que se realizan por hidrocarburos, particularmente PEMEX, el cual tiene su domicilio en la Ciudad de México.

b/ Las cifras negativas se deben a que hubo importes mayores de devoluciones y/o compensaciones y/o acreditamientos a que tiene derecho el contribuyente.

Nota: Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales. Se pueden encontrar diferencias entre la Finalidad presentada por el Órgano de Fiscalización Superior (ORFIS) y la Secretaría de Finanzas y Planeación (SEFIPLAN), debido a que en la clasificación de obras del primero, cataloga en el programa Infraestructura Productiva Rural, con el Tipo Subprograma Construcción y Tipo de SubPrograma: Agrícola Viveros.

El monto de la inversión pública comprende lo devengado por la Administración Pública Estatal y Municipal con recursos propios y financiamientos federales transferidos.

Para la inversión devengada del ramo 33, se refiere a los cierres de ejercicio 2021 presentados al ORFIS por 207 municipios del Estado, así mismo, se excluyen los recursos aportados por los participantes o beneficiarios.

Monto de los flujos de inversión extranjera directa por tipo de inversión
Serie anual de 2008 a 2021 P/
(Millones de dólares)

Cuadro 25.7

| Tipo de inversión | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 |
|---------------------------|--------------|--------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|--------------|--------------|----------------|----------------|--------------|
| Total | 607.8 | 518.4 | 1 230.8 | 1 189.1 | 1 061.3 | 1 702.8 | 1 271.3 | 1 589.1 | 1 045.5 | 914.9 | 962.1 | 1 080.6 | 1 000.7 | 935.3 |
| Nuevas inversiones | 301.3 | 338.7 | 1 005.2 | 722.8 | 156.5 | 820.1 | 61.1 | 393.3 | 261.8 | 379.5 | 156.4 | 617.2 | 214.2 | 890.2 |
| Reinversión de utilidades | 231.0 | 155.6 | 136.0 | 319.3 | 244.8 | 736.6 | 479.7 | 442.2 | 341.7 | 366.9 | 580.1 | 721.8 | 406.5 | 352.2 |
| Cuentas entre compañías | 75.5 | 24.2 | 89.5 | 147.0 | 660.0 | 146.0 | 730.4 | 753.6 | 442.0 | 168.5 | 225.6 | - 258.4 | 380.0 | - 307.1 |

Nota: Los datos negativos que aparecen en el cuadro pueden deberse a diversos motivos, dependiendo del tipo de financiamiento de que se trate. En el caso de nuevas inversiones negativas, se registran cuando las empresas con inversión extranjera directa (IED) quiebran o los accionistas extranjeros venden a mexicanos sus acciones; en el caso de reinversión de utilidades, los flujos negativos se dan cuando las empresas reparten más utilidades de las que generaron en el periodo; en el caso de cuentas entre compañías, se deben a préstamos o amortización de deudas de la empresa mexicana con IED y otras empresas relacionadas residentes en el exterior. En todos los casos donde aparecen flujos negativos, se refieren a salidas netas de recursos del país, es decir, que las desinversiones fueron mayores que las inversiones. Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.

Nota: Las estadísticas estándar de inversión extranjera directa por país de origen identifican al país inversor inmediato, que muestra la fuente de financiamiento inmediata (incluyendo los llamados "paraísos fiscales") pero no en todos los casos se muestra al país del inversionista que controla en última instancia la inversión (país inversor final). La Secretaría de Economía está trabajando en una desagregación por país inversor final. Este cuadro muestra resultados parciales e integra en "Resto de los países" a aquellos en los que aún se investiga para identificar al inversor final.

Los datos negativos que aparecen en el cuadro pueden deberse a diversos motivos, dependiendo del tipo de financiamiento de que se trate. En el caso de nuevas inversiones negativas, se registran cuando las empresas con inversión extranjera directa (IED) quiebran o los accionistas extranjeros venden a mexicanos sus acciones; en el caso de reinversión de utilidades, los flujos negativos se dan cuando las empresas reparten más utilidades de las que generaron en el periodo; en el caso de cuentas entre compañías, se deben a préstamos o amortización de deudas de la empresa mexicana con IED y otras empresas relacionadas residentes en el exterior. En todos los casos donde aparecen flujos negativos, se refieren a salidas netas de recursos del país, es decir, que las desinversiones fueron mayores que las inversiones.

Debido al redondeo de las cifras, la suma de los parciales puede o no coincidir con los totales.
